

ASC REPORTING PARAMETERS

Reporting period: 1 January 2025 – 31 December 2025

Document control

Parameter	Details
Date of last update	13 October 2026
Update frequency	Annually, or whenever significant changes occur

1. Certification Status

Parameter	Status
ASC certified since	2019
Current ASC certification status	Certified

2. Environmental and Operational Performance

The following data summarise Matorka's performance for the reporting period.

Reporting parameter	Reported result
Estimated unexplained fish losses	0.79%
Number of fish escapes	0
Wildlife interactions	0
Antibiotic use	0.25 g per kg of fish produced

3. Responsible Antibiotic Use

All antibiotics used at Matorka during 2025 were prescribed under the supervision of VETAQ veterinary services and administered when necessary to treat bacterial infections and safeguard fish health and welfare.

Matorka strictly adheres to the prescribed withdrawal periods to ensure that harvested fish comply with applicable requirements regarding antibiotic residues and food safety.

4. Reporting and Transparency

Matorka is committed to transparent reporting of its environmental and operational performance in accordance with applicable Aquaculture Stewardship Council (ASC) requirements.

This document is reviewed and updated annually and whenever significant changes to the reported information occur.
